

**CUSTOM ROTOMOLDING TO FIT YOUR NEEDS**

Elkhart Plastics is a custom rotomolding company that creates molded plastic products in an almost endless variety of shapes, lengths, and thicknesses out of its six facilities. The company provides custom designs for clients in several different industries and manufactures proprietary products including pallets, TUFF Series IBCs, KONG Coolers, Connect-A-Dock, and SUV Cargo Caddy.

## Industries Served

- Recreational vehicle
- Marine
- Agriculture
- Commercial construction equipment
- Heavy trucking equipment
- Material handling
- And more

## Advantages of Elkhart Plastics

### Product Conversion

We'll help you convert to a manufacturing method that makes your product more durable and safe.

### Material Selection

Our materials are of the highest grade and quality, ensuring exceptional end results.

### Product Design & Engineering

Our team will create solutions to meet your unique requirements in the most innovative and cost-effective manner.

### Mold Making

We can provide fabricated aluminum and steel molds, cast aluminum and machined molds, and specialty finishes.

### Secondary Assembly

We'll handle the finishing touches after manufacturing to push your product toward completion.

### Storage & Shipping

Storage and drop shipping is available for customer convenience.

### Quality Assurance

Elkhart Plastics is ISO certified and adheres to a quality and environmental policy. Our team is well trained to complete visual and mechanical inspections on every part.
